

In the Matter of County Ditch No. 16

**ORDER**

The Drainage Authority, having been approached by owners about the possible repair of Ditch No. 16, and it not being clear whether or not the repairs in the ditch system were needed, the Drainage Authority authorized an engineer's study to determine the original as-built condition and whether or not repairs are needed. As part of the study by Houston Engineering, it was determined that the Bonnie Beach and North Clitherall Lake Road culverts provide inadequate hydraulic capacity for the efficient operation of the drainage system to serve its original purpose. The engineer has now provided a Hydraulic Capacity Report to the Drainage Authority.

**NOW, THEREFORE, IT IS HEREBY ORDERED:**

1. That there shall be a hearing on the Engineer's Hydraulic Capacity Report on the 18<sup>th</sup> day of October, 2010, at 6 o'clock p.m., in the Commissioners Room of the Otter Tail County Government Services Center, 500 West Fir Avenue, Fergus Falls, Minnesota.
2. That notice of the hearing shall be given by mail to the owners of the property and political subdivisions likely to be affected by the repairs proposed.

Dated: September 28, 2010
